

Expert Delivery,
Beyond Door To Door

Frontier offers fast and affordable Canadian delivery for your clients. With access to carriers specializing in every major Canadian freight corridor, Frontier is able to provide door to door delivery anywhere in Canada at a competitive price.

Sometimes, delivery to your customers door just isn't good enough. For these situations Frontier offers three levels of service to match your customers budgets and to ensure that they receive their products **when they want them, where they want them, and how they want them.**

STANDARD: Standard delivery service includes delivery by drivers that are dedicated to the safe and expeditious delivery of your goods, as per a pre arrange appointment time, directly to your customers door. This ensures that all packages are delivered when your customers are home and available to receive them at their convenience.

SUPERIOR: Superior delivery service includes all the guarantees provided by our Standard service package but including the added benefit of room specific delivery. Deliveries will occur as per the pre arranged appointment time and upon arrival your customers may choose the exact room for your goods to be delivered to. This is especially convenient for overly large or heavy products.

ELITE: For the best possible service Frontier offers ELITE Delivery. As per all service packages, delivery is made by appointment by professional employees but includes, specific product placement and removal and disposal of all unwanted packaging, as well on-the-spot product assembly. The elite service package allows for convenient "ready to use" delivery of all goods and is especially handy for all large, heavy, or "some assembly required" products.
